Module Outline

Explore the live visual tree

Inspect properties at runtime

Demo

Explore the live visual tree

Demo

Inspect properties at runtime

Summary

Use the XAML debugging tools

- Explore the live visual tree
- Inspect properties at runtime

Analyze and explore WinUI applications

Congratulations!

Course Summary

Build a WinUI application

- Create a user interface in XAML
- Use data binding
- Apply the MVVM pattern

Work with different WinUI features

- Define resources
- Create data templates
- Use styles
- Edit control templates

Debug your WinUI application

Thank You!
